

# NATIONAL INSTITUTE OF TECHNOLOGY HAMIRPUR <br> Department of Mathematics \& Scientific Computing <br> End-semester examination <br> Class: B. Tech - $\mathbf{4}^{\text {th }}$ Semester 

## .Course Title: Statistical Methods

Maximum Marks: 50

Course code: MA-222
Time: 3:00 Hours

Note: All questions are compulsory and carry equal marks (5).
Q. 1 A random sample of eight drivers insured with a company and having similar auto insurance policies was selected. The following table lists their driving experiences (independent variable) and monthly auto insurance premiums (dependent variable).

| Driving experience <br> (in years) | 5 | 2 | 12 | 9 | 15 | 6 | 25 | 16 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Monthly Auto <br> insurance premium | 64 | 87 | 50 | 71 | 44 | 56 | 42 | 60 |

a) Is there positive or negative relationship between these two variables?
b) Find the least squares regression line.
Q. 2 The time taken by 50 students to complete a 100 meter race are given below. Find its standard deviation by step deviation method and also find coefficient of variation.

| Time taken | $8.5-9.5$ | $9.5-10.5$ | $10.5-11.5$ | $11.5-12.5$ | $12.5-13.5$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{f}_{\mathrm{i}}$ | 6 | 8 | 17 | 10 | 9 |

Q. 3 Two reserchers adopted different sampling techniques while investigating the same group of students to find the numbers of students falling in different intelligence levels. The results are as follows

| Reseacher | No. of students on each level |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| $\mathbf{X}$ | Below average | Average | Above average | Genius |
| $\mathbf{Y}$ | 86 | 60 | 44 | 10 |

Are the sampling techniques adopted by the two researchers are significantly different?
Q. 4 Explain the meaning of "Analysis of variance" and give its uses. State the basic assumptions in the analysis of variance. Give the various steps in carrying out the ANOVA of a twoway classified data.

Q. 5 Four processes A, B C and D are tested to see whether their average outputs are equivalent. The following observation of output are made.

| Processes | Average Output |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| A | 55 | 49 | 42 | 21 | 52 |
| B | 61 | 112 | 30 | 89 | 63 |
| C | 42 | 97 | 81 | 95 | 92 |
| D | 169 | 137 | 169 | 85 | 154 |

Carry out the 'Analysis of Variance' and state your conclusion. If there is found any significant difference between these prosesses, do pairwise comparison using LSD Test. ( F -Table value at $5 \%$ Level of significance $=3.06, \mathrm{t}$-table value $=2.12$ )
Q. 6 A population consist of five numbers $3,6,9,12$ and 15 . Draw a possible sample of size 2 from the sampling distribution of sample mean and verify the results

1. $E(\bar{x})=\mu$
2. $\operatorname{Var}(\bar{x})=\frac{\sigma^{2}}{n}\left(\frac{N-n}{N-1}\right)$
Q. 7 Define order statistics. Consider 5 random variables $X_{1}, X_{2}, X_{3}, X_{4}, X_{5}$, all having uniform distribution. Calculate $3^{\text {rd }}$ Order statistics. The pdf and cdf of uniform distribution are

$$
\mathrm{f}_{\mathrm{x}}(\mathrm{x})=\left\{\begin{array}{c}
1 ; 0 \leq x \leq 1 \\
0 ; \text { otherwise }
\end{array}\right\}, \quad \mathrm{F}_{\mathrm{x}}(\mathrm{x})=\left\{\begin{array}{cc}
0 & ; x \leq 0 \\
x ; & 0 \leq x \leq 1 \\
1 & ; \geq 1
\end{array}\right\}
$$

Q. 8 There are 8 groups and having 3 observations of each, mean of group A, B, C, D, E, F, G, and H are $79.67,84,91.67,82,76,74,84.33$ and 83.67 respectively. MSE is 7.83 and error df is 14. Apply DMRT Test and draw conclusion. (Table values are : 3.03, 3.18, 3.27, 3.33, 3.37, 3.39, 3.41)
Q. 9 Differentiate the following (Write yours answer in 2-3 lines)
a) correlation and rank correlation
b) skewness and kurtosis
c) Type-I and Type-II Errors
d) Mean Deviation and Quartile Deviation
e) Least significant Difference test and Tukey's Test.
Q. 10 a) Write a short note on Testing of Hypothesis. Give various Steps to test a hypothesis.
b) What are Multiple Range tests? Explain LSD and DMRT tests along with procedure.
